Community Day

Sponsorship prospectus

27 October 2026

Brussels, Belgium

What to expect

- 📍 Brussels, Belgium
- 📅 27 October 2026
- 👥 Industry, government & open source
- 🎤 Expert speakers

Code & Compliance Community Day is where **software manufacturers, policymakers, industry & open source leaders, and compliance professionals** come together to explore practical approaches to **implementing the Cyber Resilience Act, the AI Act**, and other emerging software regulations.

Highlights:

- Expert keynotes and technical sessions
- Practical implementation guidance
- Networking & cross-industry collaboration

Why become a sponsor?

Connect with decision-makers

Build relationships with manufacturers, policymakers, technology leaders, and compliance professionals.

Position your brand as a leader

Be recognised as a leader helping organisations navigate the CRA, AI Act and emerging regulatory requirements.

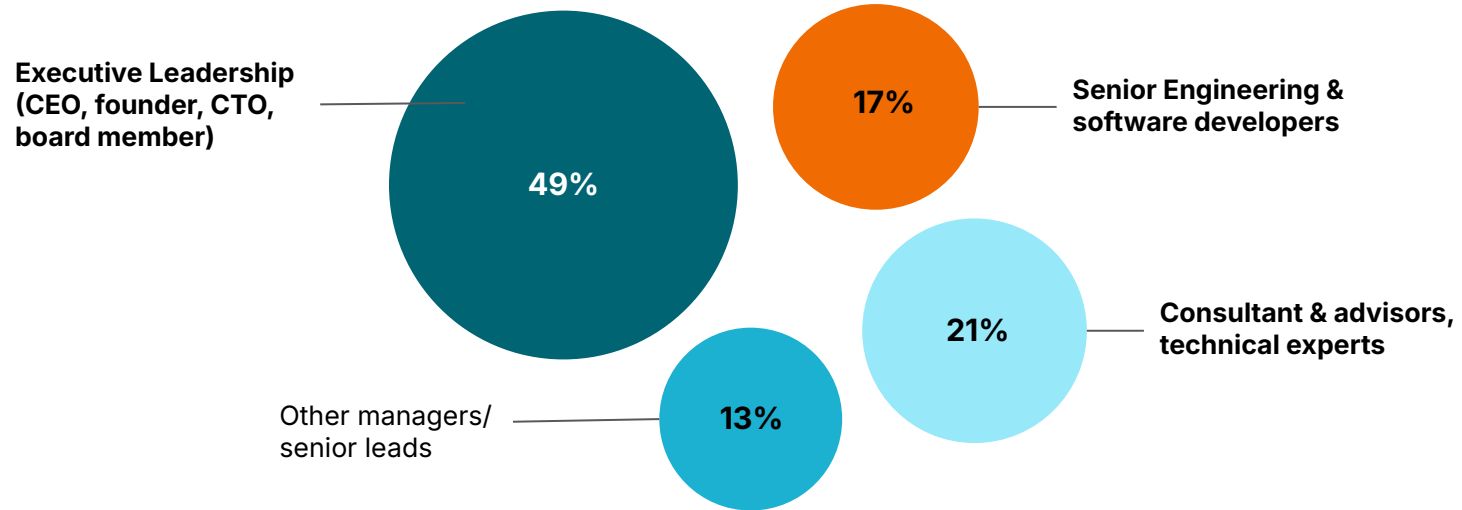

Extend your thought leadership beyond the event

Gain year-round visibility through event promotions, the conference website, social media, and session recordings..

The venue

Maison de la Poste

Maison de la Poste is one of Brussels' most iconic event venues, located within the historic Tour & Taxis site, a revitalized industrial area just minutes from the city center. This beautifully renovated building combines early 20th-century architecture with contemporary design, offering a unique and inspiring atmosphere for conferences, workshops, and networking.

Testimonial

“Code & Compliance bridges the gap between software development and policy. By connecting open source practitioners with the latest regulatory debates, it helps ensure that their voices are heard.”

Felix Reda
Director of Developer Policy
GitHub

Testimonial

"To keep the entire tech and open source ecosystem healthy amidst emerging regulations like the EU CRA, AI Act, we need common ground. Code & Compliance offers exactly that: a community-driven stage where policymakers, maintainers, and industry professionals can collaborate directly and share practical insights for navigating compliance on the ground."
